Skills

HTML | CSS | JavaScript | Angular | PrimeNG | REST APIs | NgRx SignalsStore | Node.js | Express | Typescript | Snowflake | Mapbox | Azure Devops | Github | Postman | VS Code | DSA

Professional Summary

Software Engineer with 2+ years of experience developing enterprise web applications using Angular, TypeScript, and REST APIs. Experienced in building scalable platforms, integrating backend services, and delivering high-performance frontend solutions in Agile environments.

Work Experience

Crosslynx US LLC | Software Engineer | Noida
Nov 2023 – Present
Areas of responsibility:

- Developed and maintained enterprise web applications using Angular and TypeScript.
- Implemented UI components using PrimeNG and managed application state using NgRx Signals Store.
- Integrated REST APIs and collaborated with backend teams for seamless data flow.
- Contributed to frontend architecture planning and feature implementation.
- Built monitoring dashboards for electric meter infrastructure.
- Developed map-based visualization features using Mapbox for grid monitoring systems.
- Worked with Snowflake database and Node.js APIs for backend integration.
- Managed services using Azure cloud infrastructure.

Cloudify | Intern - Javascript Developer | Remote
Jun 2023 – Sep 2023
Areas of responsibility:

- Integrated REST APIs to automate Sales and Finance workflows.
- Assisted in improving client support systems and resolving integration issues.

Projects

ATS – Automated testing platform for electric meters.
VGS – Virtual Gateway Server monitoring tool.
UNITE – Supply chain management platform connecting suppliers and buyers.
SPEED – Electric grid monitoring and forecasting system with map-based visualization.

Academic Projects

Pantaloons Clone | ***Github Link***

- Built an e-commerce platform with product listing, authentication, cart, and checkout functionality.

Tech Stack: JavaScript, React, Node.js, Express.js, MongoDB
